# Product datasheet for CF503186

## CRALBP (RLBP1) Mouse Monoclonal Antibody [Clone ID: OTI1G6]

## **Product data:**

| Product Type:           | Primary Antibodies                                                                                                                                                                                                                                                                                                                   |  |
|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| Clone Name:             | OTI1G6                                                                                                                                                                                                                                                                                                                               |  |
| Applications:           | FC, IHC, WB                                                                                                                                                                                                                                                                                                                          |  |
| Recommended Dilution:   | WB 1:2000, IHC 1:150, FLOW 1:100                                                                                                                                                                                                                                                                                                     |  |
| Reactivity:             | Human, Mouse, Rat                                                                                                                                                                                                                                                                                                                    |  |
| Host:                   | Mouse                                                                                                                                                                                                                                                                                                                                |  |
| lsotype:                | lgG2a                                                                                                                                                                                                                                                                                                                                |  |
| Clonality:              | Monoclonal                                                                                                                                                                                                                                                                                                                           |  |
| Immunogen:              | Full length human recombinant protein of human RLBP1(NP_000317) produced in HEK293T<br>cell.                                                                                                                                                                                                                                         |  |
| Formulation:            | Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)                                                                                                                                                                                                                                                                    |  |
| Reconstitution Method:  | For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific) |  |
| Purification:           | Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography<br>(protein A/G)                                                                                                                                                                                                                         |  |
| Conjugation:            | Unconjugated                                                                                                                                                                                                                                                                                                                         |  |
| Storage:                | Store at -20°C as received.                                                                                                                                                                                                                                                                                                          |  |
| Stability:              | Stable for 12 months from date of receipt.                                                                                                                                                                                                                                                                                           |  |
| Predicted Protein Size: | 36.3 kDa                                                                                                                                                                                                                                                                                                                             |  |
| Gene Name:              | retinaldehyde binding protein 1                                                                                                                                                                                                                                                                                                      |  |

| CRALBP (RLBP1) Mouse Monoclonal Antibody [Clone ID: OTI1G6] – CF503186 |
|------------------------------------------------------------------------|
|                                                                        |

Background: The protein encoded by this gene is a 36-kD water-soluble protein which carries 11-cisretinaldehyde or 11-cis-retinal as physiologic ligands. It may be a functional component of the visual cycle. Mutations of this gene have been associated with severe rod-cone dystrophy, Bothnia dystrophy (nonsyndromic autosomal recessive retinitis pigmentosa) and retinitis punctata albescens. [provided by RefSeq]

#### **Product images:**

HEK293T cells were transfected with the pCMV6-ENTRY control (Cat# [PS100001], Left lane) or pCMV6-ENTRY RLBP1 (Cat# [RC201136], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-RLBP1(Cat# [TA503186]). Positive lysates [LY424794] (100ug) and [LC424794] (20ug) can be purchased separately from OriGene.

Western blot analysis of extracts (10ug) from 2 different cell lines by using anti-RLBP1 monoclonal antibody at 1:200 dilution.

Immunohistochemical staining of paraffinembedded Adenocarcinoma of Human endometrium tissue using anti-RLBP1 mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

Immunohistochemical staining of paraffinembedded Carcinoma of Human prostate tissue using anti-RLBP1 mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

Immunohistochemical staining of paraffinembedded Human tonsil within the normal limits using anti-RLBP1 mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2025 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

HEK293T cells transfected with either [RC201136] overexpress plasmid (Red) or empty vector control plasmid (Blue) were immunostained by anti-RLBP1 antibody ([TA503186]), and then analyzed by flow cytometry.
