Ribophorin I (RPN1) Mouse Monoclonal Antibody [Clone ID: OTI1G5]

Product data:

Product Type: Primary Antibodies

Clone Name: OTI1G5
Applications: FC, IF, WB

Recommended Dilution: WB 1:2000, IF 1:100, FLOW 1:100

Reactivity: Human, Mouse, Rat

Host: Mouse Isotype: IgG2a

Clonality: Monoclonal

Immunogen: Full length human recombinant protein of human RPN1(NP_002941) produced in HEK293T

cell.

Formulation: Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)

Reconstitution Method: For reconstitution, we recommend adding 100uL distilled water to a final antibody

concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)

Purification: Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Conjugation: Unconjugated

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Predicted Protein Size: 66.2 kDa

Gene Name: ribophorin I

Database Link: NP 002941

Entrez Gene 25596 RatEntrez Gene 6184 Human

P04843

Background:

This gene encodes a type I integral membrane protein found only in the rough endoplasmic reticulum. The encoded protein is part of an N-oligosaccharyl transferase complex that links high mannose oligosaccharides to asparagine residues found in the Asn-X-Ser/Thr consensus motif of nascent polypeptide chains. This protein forms part of the regulatory subunit of the 26S proteasome and may mediate binding of ubiquitin-like domains to this proteasome. [provided by RefSeq]

Synonyms: OST1; RBPH1

Protein Families: Transmembrane

Protein Pathways: Metabolic pathways, N-Glycan biosynthesis

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY RPN1 ([RC201554], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-RPN1. Positive lysates [LY418997] (100ug) and [LC418997] (20ug) can be purchased separately from OriGene.

Anti-RPN1 mouse monoclonal antibody ([TA503652]) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY RPN1 ([RC201554]).

HEK293T cells transfected with either [RC201554] overexpress plasmid (Red) or empty vector control plasmid (Blue) were immunostained by anti-RPN1 antibody ([TA503652]), and then analyzed by flow cytometry.
