Lipoprotein lipase (LPL) Mouse Monoclonal Antibody [Clone ID: OTI3F9]

Product data:

Product Type: Primary Antibodies

Clone Name: OTI3F9
Applications: WB

Recommended Dilution: WB 1:2000

Reactivity: Human, Mouse, Rat

Host: Mouse Isotype: IgG1

Clonality: Monoclonal

Immunogen: Human recombinant protein fragment corresponding to amino acids 28-475 of human

LPL(NP_000228) produced in E.coli.

Formulation: Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)

Reconstitution Method: For reconstitution, we recommend adding 100uL distilled water to a final antibody

concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)

Purification: Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Conjugation: Unconjugated

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Predicted Protein Size: 50.3 kDa

Gene Name: lipoprotein lipase

Database Link: NP 000228

Lipoprotein lipase (LPL) Mouse Monoclonal Antibody [Clone ID: OTI3F9] - CF503786

Background: LPL encodes lipoprotein lipase, which is expressed in heart, muscle, and adipose tissue. LPL

functions as a homodimer, and has the dual functions of triglyceride hydrolase and

ligand/bridging factor for receptor-mediated lipoprotein uptake. Severe mutations that cause LPL deficiency result in type I hyperlipoproteinemia, while less extreme mutations in LPL are

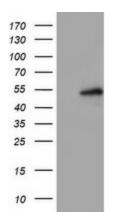

linked to many disorders of lipoprotein metabolism. [provided by RefSeq]

Synonyms: HDLCQ11; LIPD

Protein Families: Druggable Genome

Protein Pathways: Alzheimer's disease, Glycerolipid metabolism, PPAR signaling pathway

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY LPL ([RC203766], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-LPL. Positive lysates [LY400089] (100ug) and [LC400089] (20ug) can be purchased separately from OriGene.
