

Product datasheet for **CF504599**

CRYZL1 Mouse Monoclonal Antibody [Clone ID: OT11A3]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OT11A3
Applications:	WB
Recommended Dilution:	WB 1:2000
Reactivity:	Human, Mouse, Rat
Host:	Mouse
Isotype:	IgG2b
Clonality:	Monoclonal
Immunogen:	Full length human recombinant protein of human CRYZL1(NP_665857) produced in HEK293T cell.
Formulation:	Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)
Reconstitution Method:	For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	38.5 kDa
Gene Name:	Homo sapiens crystallin zeta like 1 (CRYZL1), mRNA.
Database Link:	NP_665857 Entrez Gene 66609 MouseEntrez Gene 288256 RatEntrez Gene 9946 Human
Background:	This gene encodes a protein that has sequence similarity to zeta crystallin, also known as quinone oxidoreductase. This zeta crystallin-like protein also contains an NAD(P)H binding site. Alternatively spliced transcript variants have been observed but their full-length nature has not been completely determined. [provided by RefSeq]. COMPLETENESS: complete on the 3' end.
Synonyms:	4P11; QOH-1

Protein Families: Druggable Genome

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY CRYZL1 ([RC205953], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-CRYZL1. Positive lysates [LY407853] (100ug) and [LC407853] (20ug) can be purchased separately from OriGene.
