MRPS34 Mouse Monoclonal Antibody [Clone ID: OTI4B9]

Product data:

Product Type: Primary Antibodies

Clone Name: OTI4B9

Applications: IF, IHC, WB

Recommended Dilution: WB 1:200, IHC 1:150, IF 1:100

Reactivity: Human, Mouse, Rat

Host: Mouse Isotype: IgG1

Clonality: Monoclonal

Immunogen: Full length human recombinant protein of human MRPS34(NP_076425) produced in E.coli.

Formulation: Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)

Reconstitution Method: For reconstitution, we recommend adding 100uL distilled water to a final antibody

concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)

Purification: Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Conjugation: Unconjugated

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Predicted Protein Size: 25.5 kDa

Gene Name: mitochondrial ribosomal protein S34

Database Link: NP 076425

Entrez Gene 79044 MouseEntrez Gene 65993 Human

P82930

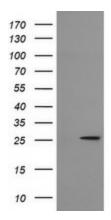

Background:

Mammalian mitochondrial ribosomal proteins are encoded by nuclear genes and help in protein synthesis within the mitochondrion. Mitochondrial ribosomes (mitoribosomes) consist of a small 28S subunit and a large 39S subunit. They have an estimated 75% protein to rRNA composition compared to prokaryotic ribosomes, where this ratio is reversed. Another difference between mammalian mitoribosomes and prokaryotic ribosomes is that the latter contain a 5S rRNA. Among different species, the proteins comprising the mitoribosome differ greatly in sequence, and sometimes in biochemical properties, which prevents easy recognition by sequence homology. This gene encodes a 28S subunit protein. Alternate splice variants of this gene have been described but their full-length nature has not been determined. [provided by RefSeq, Jul 2008]

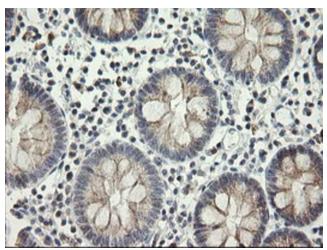

Synonyms:

MRP-S12; MRP-S34; MRPS12

Product images:

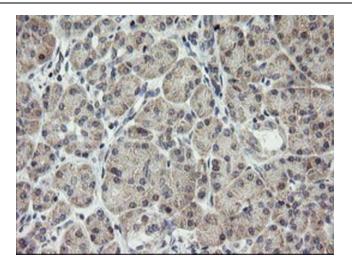

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY MRPS34 ([RC200834], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-MRPS34. Positive lysates [LY411441] (100ug) and [LC411441] (20ug) can be purchased separately from OriGene.

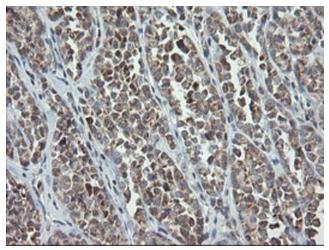

Immunohistochemical staining of paraffinembedded Human colon tissue within the normal limits using anti-MRPS34 mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

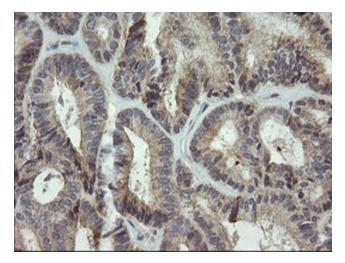

Immunohistochemical staining of paraffinembedded Human pancreas tissue within the normal limits using anti-MRPS34 mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

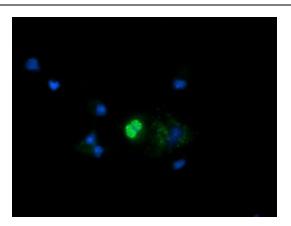

Immunohistochemical staining of paraffinembedded Carcinoma of Human thyroid tissue using anti-MRPS34 mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

Immunohistochemical staining of paraffinembedded Adenocarcinoma of Human endometrium tissue using anti-MRPS34 mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

Anti-MRPS34 mouse monoclonal antibody ([TA505233]) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY MRPS34 ([RC200834]).
