CD105 (ENG) Mouse Monoclonal Antibody [Clone ID: OTI8A1]

Product data:

Product Type: Primary Antibodies

Clone Name: OTI8A1
Applications: IF, WB

Recommended Dilution: WB 1:200~4000, IF 1:100

Reactivity: Human
Host: Mouse
Isotype: IgG2b

Clonality: Monoclonal

Immunogen: Full length human recombinant protein of human ENG(NP_000109) produced in HEK293T

cell

Formulation: Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)

Reconstitution Method: For reconstitution, we recommend adding 100uL distilled water to a final antibody

concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)

Purification: Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Conjugation: Unconjugated

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Predicted Protein Size: 65 kDa

Gene Name: endoglin

Database Link: NP 000109

Entrez Gene 2022 Human

P17813

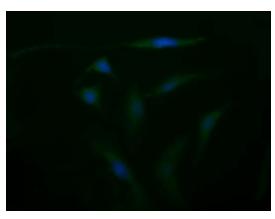

Background:

This gene encodes a homodimeric transmembrane protein which is a major glycoprotein of the vascular endothelium. This protein is a component of the transforming growth factor beta receptor complex and it binds TGFB1 and TGFB3 with high affinity. Mutations in this gene cause hereditary hemorrhagic telangiectasia, also known as Osler-Rendu-Weber syndrome 1, an autosomal dominant multisystemic vascular dysplasia. Alternatively spliced transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Sep 2008]

Synonyms: END; HHT1; ORW1

Protein Families: Druggable Genome, ES Cell Differentiation/IPS, Transmembrane

Product images:

Immunofluorescent staining of HeLa cells using anti-ENG mouse monoclonal antibody ([TA506170]).

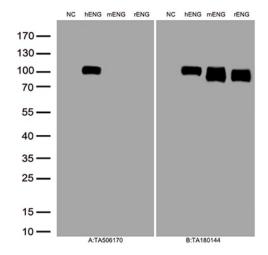

Figure A, Western blot analysis of overexpressed lysates(25ug per lane) from HEK293T cells transfected with empty plasmid ([PS100001], lane NC), human ENG plasmid ([RC221699], lane hENG), mouse ENG plasmid ([MR222686], lane mENG), rat ENG plasmid ([RR212346], lane rENG) using anti-ENG antibody [TA506170] (1:500). Figure B, Western blot analysis of the same samples as figure A with anti-DDK antibody ([TA180144], 1:1000)
