# Product datasheet for CF506192

## Lysozyme (LYZ) Mouse Monoclonal Antibody [Clone ID: OTI1D8]

## **Product data:**

Product Type:	Primary Antibodies
Clone Name:	OTI1D8
Applications:	IF, WB
<b>Recommended Dilution:</b>	WB 1:4000, IF 1:100
Reactivity:	Human
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Full length human recombinant protein of human LYZ(NP_000230) produced in HEK293T cell.
Formulation:	Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)
Reconstitution Method:	For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	14.7 kDa
Gene Name:	lysozyme
Database Link:	<u>NP_000230</u> <u>Entrez Gene 4069 Human</u> <u>P61626</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

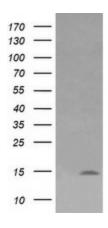

#### **GRIGENE** Lysozyme (LYZ) Mouse Monoclonal Antibody [Clone ID: OTI1D8] – CF506192

Background:This gene encodes human lysozyme, whose natural substrate is the bacterial cell wall<br/>peptidoglycan (cleaving the beta[1-4]glycosidic linkages between N-acetylmuramic acid and<br/>N-acetylglucosamine). Lysozyme is one of the anti-microbial agents found in human milk, and<br/>is also present in spleen, lung, kidney, white blood cells, plasma, saliva, and tears. Missense<br/>mutations in LYZ have been identified in heritable renal amyloidosis. [provided by RefSeq, Jul<br/>2008]

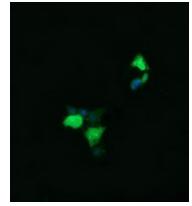

Synonyms:	LYZF1; LZM
-----------	------------

Protein Families: Druggable Genome

### **Product images:**

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY LYZ ([RC200730], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-LYZ. Positive lysates [LY400091] (100ug) and [LC400091] (20ug) can be purchased separately from OriGene.

Anti-LYZ mouse monoclonal antibody ([TA506192]) immunofluorescent staining of COS7 cells transiently transfected by pCMV6-ENTRY LYZ ([RC200730]).
