Ki67 (MKI67) Mouse Monoclonal Antibody [Clone ID: OTI2B4]

Product data:

Product Type: Primary Antibodies

Clone Name: OTI2B4

Applications: WB

Recommended Dilution: WB 1:200 - 1:1000

Reactivity: Human
Host: Mouse
Isotype: IgG1

Clonality: Monoclonal

Immunogen: Human recombinant protein fragment corresponding to amino acids 1160-1493 of human

MKI67 (NP_002408) produced in E.coli.

Formulation: Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)

Reconstitution Method: For reconstitution, we recommend adding 100uL distilled water to a final antibody

concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)

Purification: Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Conjugation: Unconjugated

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Gene Name: marker of proliferation Ki-67

Database Link: NP 002408

Entrez Gene 4288 Human

P46013

Background: This gene encodes a nuclear protein that is associated with and may be necessary for cellular

proliferation. Alternatively spliced transcript variants have been described. A related

pseudogene exists on chromosome X. [provided by RefSeq, Mar 2009]

Synonyms: KIA; MIB-; MIB-1; PPP1R105

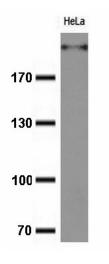

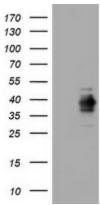

Protein Families: Dru

Druggable Genome, ES Cell Differentiation/IPS

Product images:

Western blot analysis of extracts (10ug) from 1 cell line by using anti-MKI67 monoclonal antibody at 1:200.

E.coli lysate (left lane) and E.coli lysate expressing human recombinant protein fragment corresponding to amino acids 1160-1493 of human MKI67 (NP_002408) were separated by SDS-PAGE and immunoblotted with anti-MKI67.
