Product datasheet for CF800667

TIA1 Mouse Monoclonal Antibody [Clone ID: OTI1C4]

Product data:

Product Type:	Primary Antibodies	
Clone Name:	OTI1C4	
Applications:	WB	
Recommended Dilution:	WB 1:2000	
Reactivity:	Human, Mouse, Rat	
Host:	Mouse	
lsotype:	lgG1	
Clonality:	Monoclonal	
Immunogen:	Full length human recombinant protein of human TIA1 (NP_071505) produced in HEK293T cell.	
Formulation:	Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)	
Reconstitution Method:	For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)	
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)	
Conjugation:	Unconjugated	
Storage:	Store at -20°C as received.	
Stability:	Stable for 12 months from date of receipt.	
Predicted Protein Size:	42.8 kDa	
Gene Name:	TIA1 cytotoxic granule associated RNA binding protein	
Database Link:	<u>NP_071505</u> <u>Entrez Gene 21841 MouseEntrez Gene 312510 RatEntrez Gene 7072 Human</u> <u>P31483</u>	

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

Image: Synonyms:TIA1 Mouse Monoclonal Antibody [Clone ID: OTI1C4] - CF800667Background:The product encoded by this gene is a member of a RNA-binding protein family and
possesses nucleolytic activity against cytotoxic lymphocyte (CTL) target cells. It has been
suggested that this protein may be involved in the induction of apoptosis as it preferentially
recognizes poly(A) homopolymers and induces DNA fragmentation in CTL targets. The major
granule-associated species is a 15-kDa protein that is thought to be derived from the
carboxyl terminus of the 40-kDa product by proteolytic processing. Alternative splicing
resulting in different isoforms of this gene product has been described in the literature.
[provided by RefSeq, Jul 2008]Synonyms:ALS26; TIA-1; WDM

Protein Families: Druggable Genome

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY TIA1 ([RC219386], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-TIA1. Positive lysates [LY411728] (100ug) and [LC411728] (20ug) can be purchased separately from OriGene.
