Product datasheet for CF801161

NFH (NEFH) Mouse Monoclonal Antibody [Clone ID: OTI10A7]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI10A7
Applications:	IHC, WB
Recommended Dilution:	WB 1:2000, IHC 1:2000
Reactivity:	Human, Rat
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Human recombinant protein fragment corresponding to amino acids 778-1020 of human NEFH (NP_066554) produced in E.coli.
Formulation:	Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)
Reconstitution Method:	For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Gene Name:	neurofilament heavy chain
Database Link:	<u>NP_066554</u> <u>Entrez Gene 24587 RatEntrez Gene 4744 Human</u> <u>P12036</u>

	NFH (NEFH) Mouse Monoclonal Antibody [Clone ID: OTI10A7] – CF801161
Background:	Neurofilaments are type IV intermediate filament heteropolymers composed of light, medium, and heavy chains. Neurofilaments comprise the axoskeleton and functionally maintain neuronal caliber. They may also play a role in intracellular transport to axons and dendrites. This gene encodes the heavy neurofilament protein. This protein is commonly used as a biomarker of neuronal damage and susceptibility to amyotrophic lateral sclerosis (ALS) has been associated with mutations in this gene. [provided by RefSeq, Oct 2008]
Synonyms:	NFH
Protein Families	: Druggable Genome
Protein Pathway	s: Amyotrophic lateral sclerosis (ALS)

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Cat# [PS100001], Left lane) or pCMV6-ENTRY NEFH (Cat# [RC213487], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-NEFH (Cat# [TA801161]). Positive lysates [LY412101] (100ug) and [LC412101] (20ug) can be purchased separately from OriGene.

Immunohistochemical staining of paraffinembedded Human embryonic cerebellum within the normal limits using anti-NEFH mouse monoclonal antibody. (Heat-induced epitope retrieval by 1mM EDTA in 10mM Tris buffer (pH8.5) at 120°C for 3min, [TA801161]) (1:2000)
