# Product datasheet for CF801228

# p18 INK4c (CDKN2C) Mouse Monoclonal Antibody [Clone ID: OTI1H1]

### **Product data:**

| Product Type:           | Primary Antibodies   |
|-------------------------|--|
| Clone Name:             | OTI1H1   |
| Applications:           | WB   |
| Recommended Dilution:   | WB 1:2000  |
| Reactivity:             | Human, Mouse, Rat  |
| Host:                   | Mouse  |
| lsotype:                | lgG1   |
| Clonality:              | Monoclonal   |
| Immunogen:              | Full length human recombinant protein of human CDKN2C (NP_001253) produced in E.coli.  |
| Formulation:            | Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)  |
| Reconstitution Method:  | For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific) |
| Purification:           | Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)  |
| Conjugation:            | Unconjugated   |
| Storage:                | Store at -20°C as received.  |
| Stability:              | Stable for 12 months from date of receipt.   |
| Predicted Protein Size: | 17.9 kDa   |
| Gene Name:              | cyclin dependent kinase inhibitor 2C   |
| Database Link:          | <u>NP_001253</u><br><u>Entrez Gene 12580 MouseEntrez Gene 54238 RatEntrez Gene 1031 Human</u><br><u>P42773</u>   |

|                   | NK4c (CDKN2C) Mouse Monoclonal Antibody [Clone ID: OTI1H1] – CF801228  |  |  |
|-------------------|--|--|--|
| Background:       | The protein encoded by this gene is a member of the INK4 family of cyclin-dependent kinase<br>inhibitors. This protein has been shown to interact with CDK4 or CDK6, and prevent the<br>activation of the CDK kinases, thus function as a cell growth regulator that controls cell cycle<br>G1 progression. Ectopic expression of this gene was shown to suppress the growth of human<br>cells in a manner that appears to correlate with the presence of a wild-type RB1 function.<br>Studies in the knockout mice suggested the roles of this gene in regulating spermatogenesis,<br>as well as in suppressing tumorigenesis. Two alternatively spliced transcript variants of this<br>gene, which encode an identical protein, have been reported. [provided by RefSeq, Jul 2008] |  |  |
| Synonyms:         | INK4C; p18; p18-INK4C  |  |  |
| Protein Families: | Druggable Genome   |  |  |
| Protein Pathways  | s: Cell cycle  |  |  |

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY CDKN2C ([RC213083], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-CDKN2C. Positive lysates [LY420041] (100ug) and [LC420041] (20ug) can be purchased separately from OriGene.
