# Product datasheet for CF801586

### Kallikrein 8 (KLK8) Mouse Monoclonal Antibody [Clone ID: OTI3H1]

#### **Product data:**

| Product Type:           | Primary Antibodies   |
|-------------------------|--|
| Clone Name:             | OTI3H1   |
| Applications:           | WB   |
| Recommended Dilution:   | WB 1:2000  |
| Reactivity:             | Human  |
| Host:                   | Mouse  |
| lsotype:                | lgG1   |
| Clonality:              | Monoclonal   |
| Immunogen:              | Human recombinant protein fragment corresponding to amino acids 33-260 of human KLK8<br>(NP_009127) produced in SF9 cell.  |
| Formulation:            | Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)  |
| Reconstitution Method:  | For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific) |
| Purification:           | Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography<br>(protein A/G)   |
| Conjugation:            | Unconjugated   |
| Storage:                | Store at -20°C as received.  |
| Stability:              | Stable for 12 months from date of receipt.   |
| Predicted Protein Size: | 27.9 kDa   |
| Gene Name:              | kallikrein related peptidase 8   |
| Database Link:          | <u>NP_009127</u><br><u>Entrez Gene 11202 Human</u><br><u>O60259</u>  |

| Kallikrein 8 (KLK8) Mouse Monoclonal Antibody [Clone ID: OTI3H1] – CF801586  |
|--|
| Kallikreins are a subgroup of serine proteases having diverse physiological functions. Growing<br>evidence suggests that many kallikreins are implicated in carcinogenesis and some have<br>potential as novel cancer and other disease biomarkers. This gene is one of the fifteen<br>kallikrein subfamily members located in a cluster on chromosome 19. Alternate splicing of<br>this gene results in four transcript variants encoding four different isoforms. The isoforms<br>exhibit distinct patterns of expression that suggest roles in brain plasticity and ovarian<br>cancer. [provided by RefSeq, Jul |
| HNP; NP; NRPN; PRSS19; TADG14  |
| Druggable Genome, Secreted Protein, Transmembrane  |

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY KLK8 ([RC208152], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-KLK8. Positive lysates [LY416130] (100ug) and [LC416130] (20ug) can be purchased separately from OriGene.
