Product datasheet for CF801616

CD30 (TNFRSF8) Mouse Monoclonal Antibody [Clone ID: OTI2G2]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI2G2
Applications:	FC, WB
Recommended Dilution:	WB 1:2000, FLOW 1:100
Reactivity:	Human
Host:	Mouse
lsotype:	IgG2a
Clonality:	Monoclonal
Immunogen:	Human recombinant protein fragment corresponding to amino acids 19-379 of human TNFRSF8 (NP_001234) produced in E.coli.
Formulation:	Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)
Reconstitution Method:	For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	61.9 kDa
Gene Name:	TNF receptor superfamily member 8
Database Link:	<u>NP_001234</u> <u>Entrez Gene 943 Human</u> <u>P28908</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	CD30 (TNFRSF8) Mouse Monoclonal Antibody [Clone ID: OTI2G2] – CF801616
Background:	The protein encoded by this gene is a member of the TNF-receptor superfamily. This receptor is expressed by activated, but not by resting, T and B cells. TRAF2 and TRAF5 can interact with this receptor, and mediate the signal transduction that leads to the activation of NF-kappaB. This receptor is a positive regulator of apoptosis, and also has been shown to limit the proliferative potential of autoreactive CD8 effector T cells and protect the body against autoimmunity. Two alternatively spliced transcript variants of this gene encoding distinct isoforms have been reported. [provided by RefSeq, Jul 2008]
Synonyms:	CD30; D1S166E; Ki-1
Protein Familie	s: Druggable Genome, ES Cell Differentiation/IPS, Stem cell - Pluripotency, Transmembrane
Protein Pathwa	ys: Cytokine-cytokine receptor interaction

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY TNFRSF8 ([RC219819], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-TNFRSF8. Positive lysates [LY420050] (100ug) and [LC420050] (20ug) can be purchased separately from OriGene.

Flow cytometric Analysis of K562 and Ramos cells, using anti-TNFRSF8 antibody ([TA801616]), (Red), compared to a nonspecific negative control antibody (TA50011), (Blue) (1:100).
