# Product datasheet for CF802839

## MRPS11 Mouse Monoclonal Antibody [Clone ID: OTI3D2]

## **Product data:**

Product Type:	Primary Antibodies
Clone Name:	OTI3D2
Applications:	IHC, WB
<b>Recommended Dilution:</b>	WB 1:2000
Reactivity:	Human
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Full length human recombinant protein of human MRPS11 (NP_073750) produced in E.coli.
Formulation:	Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)
Reconstitution Method:	For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	20.4 kDa
Gene Name:	mitochondrial ribosomal protein S11
Database Link:	<u>NP_073750</u> <u>Entrez Gene 64963 Human</u> <u>P82912</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

#### **GRIGENE** MRPS11 Mouse Monoclonal Antibody [Clone ID: OTI3D2] – CF802839

Background:Mammalian mitochondrial ribosomal proteins are encoded by nuclear genes and help in<br/>protein synthesis within the mitochondrion. Mitochondrial ribosomes (mitoribosomes)<br/>consist of a small 28S subunit and a large 39S subunit. They have an estimated 75% protein<br/>to rRNA composition compared to prokaryotic ribosomes, where this ratio is reversed.<br/>Another difference between mammalian mitoribosomes and prokaryotic ribosomes is that<br/>the latter contain a 5S rRNA. Among different species, the proteins comprising the<br/>mitoribosome differ greatly in sequence, and sometimes in biochemical properties, which<br/>prevents easy recognition by sequence homology. This gene encodes a 28S subunit protein<br/>that contains a high level of sequence similarity with ribosomal protein S11P family members.<br/>A pseudogene corresponding to this gene is found on chromosome 20. Sequence analysis<br/>identified two transcript variants that encode different protein isoforms. [provided by RefSeq,<br/>Jul

HCC-2

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY MRPS11 ([RC207075], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-MRPS11. Positive lysates [LY411534] (100ug) and [LC411534] (20ug) can be purchased separately from OriGene.

Immunohistochemical staining of paraffinembedded Carcinoma of Human pancreas tissue using anti-MRPS11 mouse monoclonal antibody. ([TA802839]) Dilution: 1:150
