Product datasheet for CF803376

GBA Mouse Monoclonal Antibody [Clone ID: OTI2B2]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI2B2
Applications:	IHC, WB
Recommended Dilution:	WB 1:2000
Reactivity:	Human, Mouse, Rat
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Human recombinant protein fragment corresponding to amino acids 40-315 of human GBA (NP_000148) produced in E.coli.
Formulation:	Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)
Reconstitution Method:	For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	55.5 kDa
Gene Name:	glucosylceramidase beta
Database Link:	<u>NP_000148</u> <u>Entrez Gene 14466 MouseEntrez Gene 2629 Human</u> <u>P04062</u>

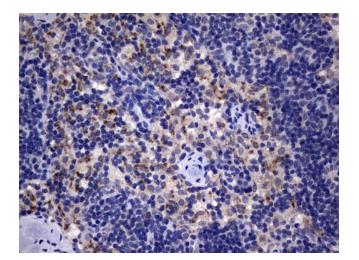

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	GBA Mouse Monoclonal Antibody [Clone ID: OTI2B2] – CF803376
Background:	This gene encodes a lysosomal membrane protein that cleaves the beta-glucosidic linkage of glycosylceramide, an intermediate in glycolipid metabolism. Mutations in this gene cause Gaucher disease, a lysosomal storage disease characterized by an accumulation of glucocerebrosides. A related pseudogene is approximately 12 kb downstream of this gene on chromosome 1. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Jan 2010]
Synonyms:	GBA1; GCB; GLUC
Protein Families	: Druggable Genome
Protein Pathway	<i>is:</i> Lysosome, Metabolic pathways, Other glycan degradation, Sphingolipid metabolism

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY GBA ([RC216061], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-GBA. Positive lysates [LY400055] (100ug) and [LC400055] (20ug) can be purchased separately from OriGene.

Immunohistochemical staining of paraffinembedded Human lymph node tissue within the normal limits using anti-GBA mouse monoclonal antibody. ([TA803376]) Dilution: 1:150
