# Product datasheet for CF803510

### MSMB Mouse Monoclonal Antibody [Clone ID: OTI3D5]

#### Product data:

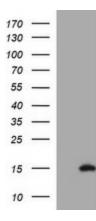

| Product Type:           | Primary Antibodies   |
|-------------------------|--|
| Clone Name:             | OTI3D5   |
| Applications:           | ELISA, IHC, WB   |
| Recommended Dilution:   | WB 1:200 - 1:1000  |
| Reactivity:             | Human  |
| Host:                   | Mouse  |
| lsotype:                | lgG2b  |
| Clonality:              | Monoclonal   |
| Immunogen:              | Purified prostate specific antigen (MSMB) from human seminal fluid   |
| Formulation:            | Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)  |
| Reconstitution Method:  | For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific) |
| Purification:           | Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography<br>(protein A/G)   |
| Conjugation:            | Unconjugated   |
| Storage:                | Store at -20°C as received.  |
| Stability:              | Stable for 12 months from date of receipt.   |
| Predicted Protein Size: | 10.7 kDa   |
| Gene Name:              | microseminoprotein beta  |
| Database Link:          | <u>NP_002434</u><br><u>Entrez Gene 4477 Human</u><br><u>P08118</u>   |

|                               | MSMB Mouse Monoclonal Antibody [Clone ID: OTI3D5] – CF803510  |
|-------------------------------|---|
| Background:                   | The protein encoded by this gene is a member of the immunoglobulin binding factor family.<br>It is synthesized by the epithelial cells of the prostate gland and secreted into the seminal<br>plasma. This protein has inhibin-like activity. It may have a role as an autocrine paracrine<br>factor in uterine, breast and other female reproductive tissues. The expression of the<br>encoded protein is found to be decreased in prostate cancer. Two alternatively spliced<br>transcript variants encoding different isoforms are described for this gene. The use of<br>alternate polyadenylation sites has been found for this gene. [provided by RefSeq, Jul 2008] |
| Synonyms:<br>Protein Families | HPC13; IGBF; MSP; MSPB; PN44; PRPS; PSP; PSP-94; PSP57; PSP94<br>Secreted Protein, Transmembrane  |
