Product datasheet for CF805049

LXR alpha (NR1H3) Mouse Monoclonal Antibody [Clone ID: OTI1F5]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI1F5
Applications:	WB
Recommended Dilution:	WB 1:2000
Reactivity:	Human, Mouse, Rat
Host:	Mouse
lsotype:	lgG2b
Clonality:	Monoclonal
Immunogen:	Human recombinant protein fragment corresponding to amino acids 69-329 of human NR1H3 (NP_005684) produced in E.coli.
Formulation:	Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)
Reconstitution Method:	For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	50.2 kDa
Gene Name:	nuclear receptor subfamily 1 group H member 3
Database Link:	<u>NP_005684</u> <u>Entrez Gene 22259 MouseEntrez Gene 58852 RatEntrez Gene 10062 Human</u> <u>Q13133</u>

CRIGENE LXR alpha (NR1H3) Mouse Monoclonal Antibody [Clone ID: OTI1F5] – CF805049

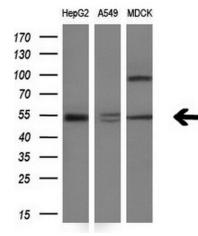

Background:	The protein encoded by this gene belongs to the NR1 subfamily of the nuclear receptor
	superfamily. The NR1 family members are key regulators of macrophage function, controlling
	transcriptional programs involved in lipid homeostasis and inflammation. This protein is
	highly expressed in visceral organs, including liver, kidney and intestine. It forms a
	heterodimer with retinoid X receptor (RXR), and regulates expression of target genes
	containing retinoid response elements. Studies in mice lacking this gene suggest that it may
	play an important role in the regulation of cholesterol homeostasis. Alternatively spliced
	transcript variants encoding different isoforms have been found for this gene. [provided by
	RefSeq, Oct 2011]

Synonyms:LXR-a; LXRA; RLD-1Protein Families:Druggable Genome, Nuclear Hormone Receptor, Transcription FactorsProtein Pathways:PPAR signaling pathway

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY NR1H3 ([RC223767], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-NR1H3. Positive lysates [LY401738] (100ug) and [LC401738] (20ug) can be purchased separately from OriGene.

Western blot analysis of extracts (10ug) from 3 different cell lines by using anti-NR1H3 monoclonal antibody (1:200).
