# **ASPA Mouse Monoclonal Antibody [Clone ID: OTI3B5]**

#### **Product data:**

**Product Type:** Primary Antibodies

Clone Name: OTI3B5

Applications: WB

Recommended Dilution: WB 1:2000

Reactivity: Human, Mouse, Rat

Host: Mouse Isotype: IgG2a

Clonality: Monoclonal

**Immunogen:** Human recombinant protein fragment corresponding to amino acids 77-313 of human

ASPA(NP\_000040) produced in E.coli.

Formulation: Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)

**Reconstitution Method:** For reconstitution, we recommend adding 100uL distilled water to a final antibody

concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)

**Purification:** Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Conjugation: Unconjugated

**Storage:** Store at -20°C as received.

**Stability:** Stable for 12 months from date of receipt.

Predicted Protein Size: 35.6 kDa

**Gene Name:** aspartoacylase

Database Link: NP 000040

### ASPA Mouse Monoclonal Antibody [Clone ID: OTI3B5] - CF805343

Background: This gene encodes an enzyme that catalyzes the conversion of N-acetyl\_L-aspartic acid (NAA)

to aspartate and acetate. NAA is abundant in the brain where hydrolysis by aspartoacylase is thought to help maintain white matter. This protein is an NAA scavenger in other tissues. Mutations in this gene cause Canavan disease. Alternatively spliced transcript variants have

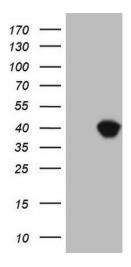

been found for this gene. [provided by RefSeq, Jul 2008]

Synonyms: ACY2; ASP

**Protein Families:** Druggable Genome

**Protein Pathways:** Alanine, aspartate and glutamate metabolism, Histidine metabolism

## **Product images:**

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY ASPA ([RC206564], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-ASPA (1:2000). Positive lysates [LY424954] (100ug) and [LC424954] (20ug) can be purchased separately from OriGene.
