Product datasheet for CF805724

PKC nu (PRKD3) Mouse Monoclonal Antibody [Clone ID: OTI4G6]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI4G6
Applications:	IHC, WB
Recommended Dilution:	WB 1:500, IHC 1:150
Reactivity:	Human, Mouse, Rat
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Human recombinant protein fragment corresponding to amino acids 300-508 of human PRKD3 (NP_005804) produced in E.coli.
Formulation:	Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)
Reconstitution Method:	For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Gene Name:	protein kinase D3
Database Link:	<u>NP_005804</u> <u>Entrez Gene 75292 MouseEntrez Gene 23683 Human</u> <u>O94806</u>

Science PKC nu (PRKD3) Mouse Monoclonal Antibody [Clone ID: OTI4G6] – CF805724

Background:Protein kinase C (PKC) is a family of serine- and threonine-specific protein kinases that can be
activated by calcium and the second messenger diacylglycerol. PKC family members
phosphorylate a wide variety of protein targets and are known to be involved in diverse
cellular signaling pathways. PKC family members also serve as major receptors for phorbol
esters, a class of tumor promoters. Each member of the PKC family has a specific expression
profile and is believed to play a distinct role. The protein encoded by this gene is one of the
PKC family members. This kinase can be activated rapidly by the agonists of G protein-
coupled receptors. It resides in both cytoplasm and nucleus, and its nuclear accumulation is
found to be dramatically enhanced in response to its activation. This kinase can also be
activated after B-cell antigen receptor (BCR) engagement, which requires intact phopholipase
C gamma and the involvement of other PKC family members. [provided by RefSeq, Jul 2008]

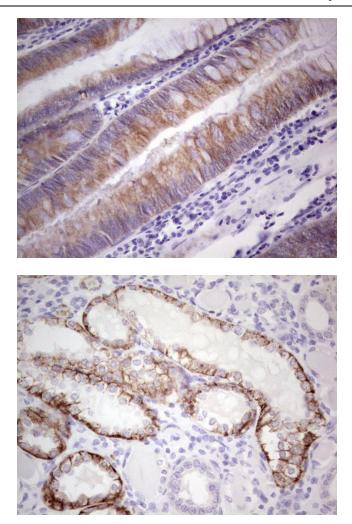

Synonyms:EPK2; nPKC-NU; PKC-NU; PKD3; PRKCNProtein Families:Druggable Genome, Protein Kinase

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Cat# [PS100001], Left lane) or pCMV6-ENTRY PRKD3 (Cat# [RC221309], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-PRKD3(Cat# [TA805724]).

Immunohistochemical staining of paraffinembedded Adenocarcinoma of Human colon tissue using anti-PRKD3 mouse monoclonal antibody. ([TA805724]; heat-induced epitope retrieval by 1mM EDTA in 10mM Tris, pH8.5, 120°C for 3min). Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.

Immunohistochemical staining of paraffinembedded Human Kidney tissue within the normal limits using anti-PRKD3 mouse monoclonal antibody. ([TA805724]; heat-induced epitope retrieval by 1mM EDTA in 10mM Tris, pH8.5, 120°C for 3min). Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.
