

Product datasheet for **CF805947**

Neurofilament (NEFM) Mouse Monoclonal Antibody [Clone ID: OTI5H4]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI5H4
Applications:	WB
Recommended Dilution:	WB 1:2000
Reactivity:	Human
Host:	Mouse
Isotype:	IgG1
Clonality:	Monoclonal
Immunogen:	Human recombinant protein fragment corresponding to amino acids 413-773 of human NEFM(NP_005373) produced in E.coli.
Formulation:	Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)
Reconstitution Method:	For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Gene Name:	neurofilament medium chain
Database Link:	NP_005373 Entrez Gene 4741 Human P07197
Synonyms:	NEF3; NF-M; NFM
Protein Pathways:	Amyotrophic lateral sclerosis (ALS)

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY NEFM ([RC224475], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-NEFM. Positive lysates [LY417338] (100ug) and [LC417338] (20ug) can be purchased separately from OriGene.

Equivalent amounts of cell lysates (10 ug per lane) of wild-type 293T cells (WT, Cat# LC810293T) and NEFM-Knockout 293T cells (KO, Cat# [LC810526]) were separated by SDS-PAGE and immunoblotted with anti-NEFM monoclonal antibody [TA805947], (1:500). Then the blotted membrane was stripped and reprobed with anti-HSP90AB1 antibody ([TA500494]) as a loading control.
