HOMER2 Mouse Monoclonal Antibody [Clone ID: OTI2D5]

Product data:

Product Type: Primary Antibodies

Clone Name: OTI2D5

Applications: WB

Recommended Dilution: WB 1:2000

Reactivity: Human, Mouse, Rat

Host: Mouse Isotype: IgG2a

Clonality: Monoclonal

Immunogen: Full length human recombinant protein of human HOMER2 (NP_004830) produced in

HEK293T cell.

Formulation: Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)

Reconstitution Method: For reconstitution, we recommend adding 100uL distilled water to a final antibody

concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)

Purification: Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Conjugation: Unconjugated

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Predicted Protein Size: 39.3 kDa

Gene Name: homer scaffold protein 2

Database Link: NP 004830

Q9NSB8

HOMER2 Mouse Monoclonal Antibody [Clone ID: OTI2D5] - CF806310

Background: This gene encodes a member of the homer family of dendritic proteins. Members of this

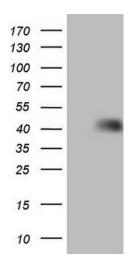

family regulate group 1 metabotrophic glutamate receptor function. The encoded protein is a postsynaptic density scaffolding protein. Alternative splicing results in multiple transcript variants. Two related pseudogenes have been identified on chromosome 14. [provided by

RefSeq, Jun

Synonyms: ACPD; CPD; DFNA68; HOMER-2; VESL-2

Protein Families: Druggable Genome

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY HOMER2 ([RC204165], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-HOMER2. Positive lysates [LY401516] (100ug) and [LC401516] (20ug) can be purchased separately from OriGene.
