Product datasheet for CF806567

M-CSF (CSF1) Mouse Monoclonal Antibody [Clone ID: OTI8E1]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI8E1
Applications:	IHC, WB
Recommended Dilution:	WB 1:2000, IHC 1:150
Reactivity:	Human
Host:	Mouse
lsotype:	lgG2b
Clonality:	Monoclonal
Immunogen:	Human recombinant protein fragment corresponding to amino acids 223-496 of human CSF1(NP_000748) produced in E.coli.
Formulation:	Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)
Reconstitution Method:	For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	59.9 kDa
Gene Name:	colony stimulating factor 1
Database Link:	<u>NP_000748</u> <u>Entrez Gene 1435 Human</u> <u>P09603</u>

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2025 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	M-CSF (CSF1) Mouse Monoclonal Antibody [Clone ID: OTI8E1] – CF806567		
Background:	The protein encoded by this gene is a cytokine that controls the production, differentiation, and function of macrophages. The active form of the protein is found extracellularly as a disulfide-linked homodimer, and is thought to be produced by proteolytic cleavage of membrane-bound precursors. The encoded protein may be involved in development of the placenta. Alternate splicing results in multiple transcript variants. [provided by RefSeq, Sep 2011]		
Synonyms:	CSF-1; MCSF		
Protein Families	Druggable Genome, ES Cell Differentiation/IPS, Secreted Protein, Transmembrane		
Protein Pathway	Cytokine-cytokine receptor interaction, Hematopoietic cell lineage

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY CSF1 ([RC217104], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-CSF1. Positive lysates [LY424534] (100ug) and [LC424534] (20ug) can be purchased separately from OriGene.

Immunohistochemical staining of paraffinembedded Human colon tissue within the normal limits using anti-CSF1 mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.
