Product datasheet for CF806740

Protein Z (PROZ) Mouse Monoclonal Antibody [Clone ID: OTI1A11]

Product data:

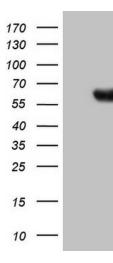

Product Type:	Primary Antibodies
Clone Name:	OTI1A11
Applications:	WB
Recommended Dilution:	WB 1:2000
Reactivity:	Human
Host:	Mouse
lsotype:	lgG2a
Clonality:	Monoclonal
Immunogen:	Human recombinant protein fragment corresponding to amino acids 115-400 of human PROZ(NP_003882) produced in E.coli.
Formulation:	Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)
Reconstitution Method:	For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	40.3 kDa
Gene Name:	protein Z, vitamin K dependent plasma glycoprotein
Database Link:	<u>NP_003882</u> <u>Entrez Gene 8858 Human</u> <u>P22891</u>

	Protein Z (PROZ) Mouse Monoclonal Antibody [Clone ID: OTI1A11] – CF806740
Background:	This gene encodes a liver vitamin K-dependent glycoprotein that is synthesized in the liver and secreted into the plasma. The encoded protein plays a role in regulating blood coagulation by complexing with protein Z-dependent protease inhibitor to directly inhibit activated factor X at the phospholipid surface. Deficiencies in this protein are associated with an increased risk of ischemic arterial diseases and fetal loss. Mutations in this gene are the cause of protein Z deficiency. Alternate splicing results in multiple transcript variants. [provided by RefSeq, Jan
Synonyms:	PZ
Protein Families	: Druggable Genome, Protease, Secreted Protein

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY PROZ ([RC210379], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-PROZ. Positive lysates [LY401283] (100ug) and [LC401283] (20ug) can be purchased separately from OriGene.
