Product datasheet for CF806976

c Fos (FOS) Mouse Monoclonal Antibody [Clone ID: OTI1F12]

Product data:

Product Type:	Primary Antibodies		
Clone Name:	OTI1F12		
Applications:	IHC, WB		
Recommended Dilution:	WB 1:2000, IHC 1:150		
Reactivity:	Human, Mouse, Rat		
Host:	Mouse		
lsotype:	lgG1		
Clonality:	Monoclonal		
Immunogen:	Full length human recombinant protein of human FOS (NP_005243) produced in E.coli.		
Formulation:	Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)		
Reconstitution Method:	For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)		
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)		
Conjugation:	Unconjugated		
Storage:	Store at -20°C as received.		
Stability:	Stable for 12 months from date of receipt.		
Predicted Protein Size:	40.5 kDa		
Gene Name:	Fos proto-oncogene, AP-1 transcription factor subunit		
Database Link:	<u>NP_005243</u> <u>Entrez Gene 14281 MouseEntrez Gene 314322 RatEntrez Gene 2353 Human</u> <u>P01100</u>		

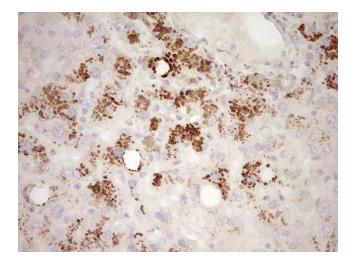

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2025 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	c Fos (FOS) Mouse Monoclonal Antibody [Clone ID: OTI1F12] – CF806976	
Background:	The Fos gene family consists of 4 members: FOS, FOSB, FOSL1, and FOSL2. These genes encode leucine zipper proteins that can dimerize with proteins of the JUN family, thereby forming the transcription factor complex AP-1. As such, the FOS proteins have been implicated as regulators of cell proliferation, differentiation, and transformation. In some cases, expression of the FOS gene has also been associated with apoptotic cell death. [provided by RefSeq, Jul 2008]	
Synonyms:	AP-1; C-FOS; p55	
Protein Families:	Druggable Genome, Transcription Factors	
Protein Pathway	s: B cell receptor signaling pathway, Colorectal cancer, MAPK signaling pathway, Pathways in cancer, T cell receptor signaling pathway, Toll-like receptor signaling pathway

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY FOS ([RC202597], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-FOS. Positive lysates [LY401614] (100ug) and [LC401614] (20ug) can be purchased separately from OriGene.

Immunohistochemical staining of paraffinembedded Human liver tissue within the normal limits using anti-FOS mouse monoclonal antibody. Heat-induced epitope retrieval by EDTA solution buffer pH 8.0 at 120°C for 3 min.
