Product datasheet for CF807294

Fascin (FSCN1) Mouse Monoclonal Antibody [Clone ID: OTI2C3]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI2C3
Applications:	WB
Recommended Dilution:	WB 1:2000
Reactivity:	Human, Mouse, Rat
Host:	Mouse
lsotype:	lgG2b
Clonality:	Monoclonal
Immunogen:	Full length human recombinant protein of human FSCN1 (NP_003079) produced in HEK293T cell.
Formulation:	Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)
Reconstitution Method:	For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	54.3 kDa
Gene Name:	fascin actin-bundling protein 1
Database Link:	<u>NP_003079</u> <u>Entrez Gene 14086 MouseEntrez Gene 683788 RatEntrez Gene 6624 Human</u> <u>Q16658</u>

GRIGENE Fascin (FSCN1) Mouse Monoclonal Antibody [Clone ID: OTI2C3] – CF807294

Background:This gene encodes a member of the fascin family of actin-binding proteins. Fascin proteins
organize F-actin into parallel bundles, and are required for the formation of actin-based
cellular protrusions. The encoded protein plays a critical role in cell migration, motility,
adhesion and cellular interactions. Expression of this gene is known to be regulated by
several microRNAs, and overexpression of this gene may play a role in the metastasis of
multiple types of cancer by increasing cell motility. Expression of this gene is also a marker
for Reed-Sternberg cells in Hodgkin's lymphoma. A pseudogene of this gene is located on the
long arm of chromosome 15. [provided by RefSeq, Sep 2011]

Synonyms: FAN1; HSN; p55; SNL

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY FSCN1 ([RC203031], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-FSCN1 (1:2000). Positive lysates [LY401076] (100ug) and [LC401076] (20ug) can be purchased separately from OriGene.
