# Product datasheet for CF807820

## Myostatin Propeptide (MSTN) Mouse Monoclonal Antibody [Clone ID: OTI2D10]

### **Product data:**

Product Type:	Primary Antibodies
Clone Name:	OTI2D10
Applications:	WB
Recommended Dilution:	WB 1:500
Reactivity:	Human, Mouse, Rat
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Human recombinant protein fragment corresponding to amino acids 24-266 of human MSTN(NP_005250) produced in E.coli.
Formulation:	Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)
Reconstitution Method:	For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	42.6 kDa
Gene Name:	myostatin
Database Link:	<u>NP_005250</u> <u>Entrez Gene 17700 MouseEntrez Gene 29152 RatEntrez Gene 2660 Human</u> <u>O14793</u>

#### **GRIGENE** Myostatin Propeptide (MSTN) Mouse Monoclonal Antibody [Clone ID: OTI2D10] – CF807820

# Background:The protein encoded by this gene is a member of the bone morphogenetic protein (BMP)<br/>family and the TGF-beta superfamily. This group of proteins is characterized by a polybasic<br/>proteolytic processing site which is cleaved to produce a mature protein containing seven<br/>conserved cysteine residues. The members of this family are regulators of cell growth and<br/>differentiation in both embryonic and adult tissues. This gene is thought to encode a<br/>secreted protein which negatively regulates skeletal muscle growth. [provided by RefSeq, Jul<br/>2008]

Synonyms:	GDF8; MSLHP

Protein Families: Druggable Genome, Secreted Protein

#### **Product images:**

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY MSTN ([RC210368], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-MSTN (1:500). Positive lysates [LY401622] (100ug) and [LC401622] (20ug) can be purchased separately from OriGene.
