# Product datasheet for CF807935

# Cardiac Troponin I (TNNI3) Mouse Monoclonal Antibody [Clone ID: OTI3B4]

### **Product data:**

Product Type:	Primary Antibodies	
Clone Name:	OTI3B4	
Applications:	WB	
Recommended Dilution:	WB 1:2000	
Reactivity:	Human, Mouse, Rat	
Host:	Mouse	
lsotype:	lgG2b	
Clonality:	Monoclonal	
Immunogen:	Recombinant protein expressed in E.coli corresponding to amino acids 1-210 of human TNNI3	
Formulation:	Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)	
Reconstitution Method:	For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)	
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)	
Conjugation:	Unconjugated	
Storage:	Store at -20°C as received.	
Stability:	Stable for 12 months from date of receipt.	
Predicted Protein Size:	23.8 kDa	
Gene Name:	troponin I3, cardiac type	
Database Link:	<u>NP_000354</u> <u>Entrez Gene 21954 MouseEntrez Gene 29248 RatEntrez Gene 7137 Human</u> <u>P19429</u>

<b>GRIGENE</b> Cardiac Troponin I (TNNI3) Mouse Monoclonal Antibody [Clone ID: OTI3B4] – CF8079		
Background:	Troponin I (TnI), along with troponin T (TnT) and troponin C (TnC), is one of 3 subunits that form the troponin complex of the thin filaments of striated muscle. TnI is the inhibitory subunit; blocking actin-myosin interactions and thereby mediating striated muscle relaxation. The TnI subfamily contains three genes: TnI-skeletal-fast-twitch, TnI-skeletal-slow-twitch, and TnI-cardiac. This gene encodes the TnI-cardiac protein and is exclusively expressed in cardiac muscle tissues. Mutations in this gene cause familial hypertrophic cardiomyopathy type 7 (CMH7) and familial restrictive cardiomyopathy (RCM). [provided by RefSeq, Jul	
Synonyms:	CMD1FF; CMD2A; CMH7; cTnl; RCM1; TNNC1	
Protein Families	Druggable Genome, ES Cell Differentiation/IPS, Stem cell - Pluripotency	
Protein Pathwa	<b>ys:</b> Cardiac muscle contraction, Dilated cardiomyopathy, Hypertrophic cardiomyopathy (HCM)

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY TNNI3 ([RC214740], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-TNNI3. Positive lysates [LY424766] (100ug) and [LC424766] (20ug) can be purchased separately from OriGene.
