Product datasheet for CF808517

BLNK Mouse Monoclonal Antibody [Clone ID: OTI4C9]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI4C9
Applications:	IHC, WB
Recommended Dilution:	WB 1:2000, IHC 1:150
Reactivity:	Human, Mouse, Rat
Host:	Mouse
lsotype:	lgG2b
Clonality:	Monoclonal
Immunogen:	Human recombinant protein fragment corresponding to amino acids 1-292 of human BLNK(NP_037446) produced in E.coli.
Formulation:	Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)
Reconstitution Method:	For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	50.3 kDa
Gene Name:	B cell linker
Database Link:	<u>NP_037446</u> <u>Entrez Gene 17060 MouseEntrez Gene 499356 RatEntrez Gene 29760 Human</u> <u>Q8WV28</u>

GRIGENE BLNK Mouse Monoclonal Antibody [Clone ID: OTI4C9] – CF808517

Background:	This gene encodes a cytoplasmic linker or adaptor protein that plays a critical role in B cell
	development. This protein bridges B cell receptor-associated kinase activation with
	downstream signaling pathways, thereby affecting various biological functions. The
	phosphorylation of five tyrosine residues is necessary for this protein to nucleate distinct
	signaling effectors following B cell receptor activation. Mutations in this gene cause
	hypoglobulinemia and absent B cells, a disease in which the pro- to pre-B-cell transition is
	developmentally blocked. Deficiency in this protein has also been shown in some cases of
	pre-B acute lymphoblastic leukemia. Alternatively spliced transcript variants have been found
	for this gene. [provided by RefSeq, May 2012]

Synonyms:AGM4; BASH; bca; BLNK-S; LY57; SLP-65; SLP65Protein Families:Druggable Genome

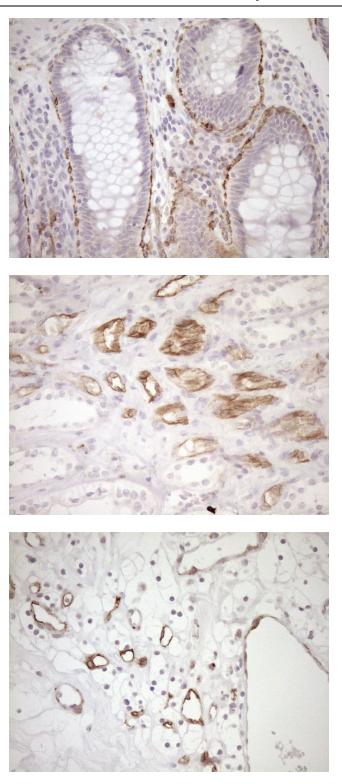

Protein Pathways: B cell receptor signaling pathway, Primary immunodeficiency

HEK293T cells were transfected with the pCMV6-ENTRY control (Cat# [PS100001], Left lane) or pCMV6-ENTRY BLNK (Cat# [RC202488], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-BLNK (Cat# [TA808517])(1:2000). Positive lysates [LY402244] (100ug) and [LC402244] (20ug) can be purchased separately from OriGene.
