MCEE Mouse Monoclonal Antibody [Clone ID: OTI13B9]

Product data:

Host:

Product Type: Primary Antibodies

Clone Name: OTI13B9

Applications: WB

Reactivity: WB 1:500 Human

Isotype: IgG2a

Clonality: Monoclonal

Immunogen: Full length human recombinant protein of human MCEE (NP_115990) produced in E.coli.

Formulation: Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)

Reconstitution Method: For reconstitution, we recommend adding 100uL distilled water to a final antibody

concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)

Purification: Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography

(protein A/G)

Mouse

Conjugation: Unconjugated

Storage: Store at -20°C as received.

Stability: Stable for 12 months from date of receipt.

Predicted Protein Size: 18.6 kDa

Gene Name: methylmalonyl-CoA epimerase

Database Link: NP 115990

Entrez Gene 84693 Human

Q96PE7

Background: The product of this gene catalyzes the interconversion of D- and L-methylmalonyl-CoA during

the degradation of branched chain amino acids. odd chain-length fatty acids, and other metabolites. Mutations in this gene result in methylmalonyl-CoA epimerase deficiency, which is presented as mild to moderate methylmalonic aciduria. [provided by RefSeq, Jul 2008]

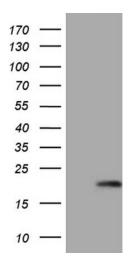

Synonyms: GLOD2

Protein Pathways: Metabolic pathways, Propanoate metabolism, Valine, leucine and isoleucine degradation

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY MCEE ([RC205018], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-MCEE (1:500). Positive lysates [LY403176] (100ug) and [LC403176] (20ug) can be purchased separately from OriGene.
