# Product datasheet for CF809061

### BNP (NPPB) Mouse Monoclonal Antibody [Clone ID: OTI12B6]

#### **Product data:**

Product Type:	Primary Antibodies	
Clone Name:	OTI12B6	
Applications:	WB	
Recommended Dilution:	WB 1:2000	
Reactivity:	Human	
Host:	Mouse	
lsotype:	lgG1	
Clonality:	Monoclonal	
Immunogen:	Human recombinant protein fragment corresponding to amino acids 27-102 of human NPPB (NP_002512) produced in E.coli.	
Formulation:	Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)	
Reconstitution Method:	For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)	
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)	
Conjugation:	Unconjugated	
Storage:	Store at -20°C as received.	
Stability:	Stable for 12 months from date of receipt.	
Predicted Protein Size:	11.9 kDa	
Gene Name:	natriuretic peptide B	
Database Link:	<u>NP_002512</u> <u>Entrez Gene 4879 Human</u> <u>P16860</u>	

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	BNP (NPPB) Mouse Monoclonal Antibody [Clone ID: OTI12B6] – CF809061		
Background:	This gene is a member of the natriuretic peptide family and encodes a secreted protein which functions as a cardiac hormone. The protein undergoes two cleavage events, one within the cell and a second after secretion into the blood. The protein's biological actions include natriuresis, diuresis, vasorelaxation, inhibition of renin and aldosterone secretion, and a key role in cardiovascular homeostasis. A high concentration of this protein in the bloodstream is indicative of heart failure. Mutations in this gene have been associated with postmenopausal osteoporosis. [provided by RefSeq, Jul 2008]		
Synonyms:	BNP; Iso-ANP		

**Protein Families:** Druggable Genome, Secreted Protein, Stem cell - Pluripotency

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY NPPB ([RC206590], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-NPPB (1:2000). Positive lysates [LY400900] (100ug) and [LC400900] (20ug) can be purchased separately from OriGene.
