	TIGIT Mouse Monoclonal Antibody [Clone ID: OTI8G7] – CF812978
Background:	This gene encodes a member of the PVR (poliovirus receptor) family of immunoglobin proteins. The product of this gene is expressed on several classes of T cells including follicular B helper T cells (TFH). The protein has been shown to bind PVR with high affinity; this binding is thought to assist interactions between TFH and dendritic cells to regulate T cell dependent B cell responses. [provided by RefSeq, Sep 2009]
Synonyms:	VSIG9; VSTM3; WUCAM
Protein Families	: Transmembrane
