Product datasheet for CF813063

Major Basic Protein (PRG2) Mouse Monoclonal Antibody [Clone ID: OTI1C12]

Product data:

Product Type:	Primary Antibodies	
Clone Name:	OTI1C12	
Applications:	WB	
Recommended Dilution:	WB 1:500	
Reactivity:	Human	
Host:	Mouse	
lsotype:	lgG2a	
Clonality:	Monoclonal	
Immunogen:	Human recombinant protein fragment corresponding to amino acids 17-222 of human PRG2 (NP_002719) produced in E.coli.	
Formulation:	Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)	
Reconstitution Method:	For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)	
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)	
Conjugation:	Unconjugated	
Storage:	Store at -20°C as received.	
Stability:	Stable for 12 months from date of receipt.	
Predicted Protein Size:	25.23 kDa	
Gene Name:	proteoglycan 2, pro eosinophil major basic protein	
Database Link:	<u>NP_002719</u> <u>Entrez Gene 5553 Human</u> <u>P13727</u>

	Major Basic Protein (PRG2) Mouse Monoclonal Antibody [Clone ID: OTI1C12] – CF813063
Background:	The protein encoded by this gene is the predominant constituent of the crystalline core of the eosinophil granule. High levels of the proform of this protein are also present in placenta and pregnancy serum, where it exists as a complex with several other proteins including pregnancy-associated plasma protein A (PAPPA), angiotensinogen (AGT), and C3dg. This protein may be involved in antiparasitic defense mechanisms as a cytotoxin and helminthotoxin, and in immune hypersensitivity reactions. The encoded protein contains a peptide that displays potent antimicrobial activity against Gram-positive bacteria, Gramnegative bacteria, and fungi. It is directly implicated in epithelial cell damage, exfoliation, and bronchospasm in allergic diseases. Alternatively spliced transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Nov 2014]
Synonyms:	BMPG; MBP; MBP1; proMBP

Synonyms:	BMPG; MBP; MBP1; proMBP
Protein Families:	Secreted Protein
Protein Pathways:	Asthma

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY PRG2 ([RC203256], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-PRG2 (1:500).
