Product datasheet for CF813249

CTLA4 Mouse Monoclonal Antibody [Clone ID: OTI10C8]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OTI10C8
Applications:	FC
Recommended Dilution:	FLOW 1:400
Reactivity:	Human
Host:	Mouse
lsotype:	lgG1
Clonality:	Monoclonal
Immunogen:	Full length human recombinant protein of human CTLA4 (NP_005205) produced in HEK293T cell.
Formulation:	Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)
Reconstitution Method:	For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Conjugation:	Unconjugated
Storage:	Store at -20°C as received.
Stability:	Stable for 12 months from date of receipt.
Predicted Protein Size:	24.66 kDa
Gene Name:	cytotoxic T-lymphocyte associated protein 4
Database Link:	<u>NP_005205</u> <u>Entrez Gene 1493 Human</u> <u>P16410</u>

	CTLA4 Mouse Monoclonal Antibody [Clone ID: OTI10C8] – CF813249
Background:	This gene is a member of the immunoglobulin superfamily and encodes a protein which transmits an inhibitory signal to T cells. The protein contains a V domain, a transmembrane domain, and a cytoplasmic tail. Alternate transcriptional splice variants, encoding different isoforms, have been characterized. The membrane-bound isoform functions as a homodimer interconnected by a disulfide bond, while the soluble isoform functions as a monomer. Mutations in this gene have been associated with insulin-dependent diabetes mellitus, Graves disease, Hashimoto thyroiditis, celiac disease, systemic lupus erythematosus, thyroid- associated orbitopathy, and other autoimmune diseases. [provided by RefSeq, Jul 2008]
Synonyms:	ALPS5; CD; CD152; CELIAC3; CTLA-4; GRD4; GSE; IDDM12
Protein Families	: Druggable Genome, Transmembrane
Protein Pathway	ys: Autoimmune thyroid disease, Cell adhesion molecules (CAMs), T cell receptor signaling pathway
