# Product datasheet for CF813415

### Nephrin (NPHS1) Mouse Monoclonal Antibody [Clone ID: OTI12D7]

#### **Product data:**

Product Type:	Primary Antibodies	
Clone Name:	OTI12D7	
Applications:	WB	
Recommended Dilution:	WB 1:1000	
Reactivity:	Human	
Host:	Mouse	
lsotype:	lgG1	
Clonality:	Monoclonal	
Immunogen:	Human recombinant protein fragment corresponding to amino acids 1077-1241 of human NPHS1 (NP_004637) produced in E.coli.	
Formulation:	Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose)	
Reconstitution Method:	For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific)	
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)	
Conjugation:	Unconjugated	
Storage:	Shipped at -20°C or with ice packs, Upon delivery store at -20°C. Dilute in PBS(pH7.3) if necessary. Stable for 12 months from date of receipt. Avoid repeated freeze-thaws.	
Stability:	Stable for 12 months from date of receipt.	
Predicted Protein Size:	134.6 kDa	
Gene Name:	NPHS1 adhesion molecule, nephrin	
Database Link:	<u>NP_004637</u> <u>Entrez Gene 4868 Human</u> <u>O60500</u>	

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	Nephrin (NPHS1) Mouse Monoclonal Antibody [Clone ID: OTI12D7] – CF813415
Background:	This gene encodes a member of the immunoglobulin family of cell adhesion molecules that functions in the glomerular filtration barrier in the kidney. The gene is primarily expressed in renal tissues, and the protein is a type-1 transmembrane protein found at the slit diaphragm of glomerular podocytes. The slit diaphragm is thought to function as an ultrafilter to exclude albumin and other plasma macromolecules in the formation of urine. Mutations in this gene result in Finnish-type congenital nephrosis 1, characterized by severe proteinuria and loss of the slit diaphragm and foot processes.[provided by RefSeq, Oct 2009]
Synonyms:	CNF; nephrin; NPHN
Protein Families	: Druggable Genome, Transmembrane

HEK293T cells were transfected with the pCMV6-ENTRY control (Cat# [PS100001], Left lane) or pCMV6-ENTRY NPHS1 (Cat# [RC217677], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-NPHS1 antibody (Cat# [TA813415])(1:1000)
