Product datasheet for CF814556

Neurofilament (NEFL) Mouse Monoclonal Antibody [Clone ID: OTI6C1]

Product data:

| Product Type: | Primary Antibodies |
|-------------------------|--|
| Clone Name: | OTI6C1 |
| Applications: | ELISA |
| Recommended Dilution: | ELISA 1:5000-10000 |
| Reactivity: | Human |
| Host: | Mouse |
| lsotype: | lgG1 |
| Clonality: | Monoclonal |
| Immunogen: | Synthetic peptide (the amino acid sequence is considered to be commercially sensitive) within Human NEFL (NP_006149). The exact sequence is proprietary. |
| Formulation: | Lyophilized powder (original buffer 1X PBS, pH 7.3, 8% trehalose) |
| Reconstitution Method: | For reconstitution, we recommend adding 100uL distilled water to a final antibody concentration of about 1 mg/mL. To use this carrier-free antibody for conjugation experiment, we strongly recommend performing another round of desalting process. (OriGene recommends Zeba Spin Desalting Columns, 7KMWCO from Thermo Scientific) |
| Purification: | Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G) |
| Conjugation: | Unconjugated |
| Predicted Protein Size: | 61.5 kDa |
| Gene Name: | neurofilament light chain |
| Database Link: | <u>NP_006149</u> <u>Entrez Gene 4747 Human</u> <u>P07196</u> |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

| | Neurofilament (NEFL) Mouse Monoclonal Antibody [Clone ID: OTI6C1] – CF814556 |
|-------------------|--|
| Background: | Neurofilaments are type IV intermediate filament heteropolymers composed of light, medium, and heavy chains. Neurofilaments comprise the axoskeleton and they functionally maintain the neuronal caliber. They may also play a role in intracellular transport to axons and dendrites. This gene encodes the light chain neurofilament protein. Mutations in this gene cause Charcot-Marie-Tooth disease types 1F (CMT1F) and 2E (CMT2E), disorders of the peripheral nervous system that are characterized by distinct neuropathies. A pseudogene has been identified on chromosome Y. [provided by RefSeq, Oct 2008] |
| Synonyms: | CMT1F; CMT2E; CMTDIG; NF-L; NF68; NFL; PPP1R110 |
| Protein Families: | Druggable Genome, ES Cell Differentiation/IPS |
| Protein Pathway | s: Amyotrophic lateral sclerosis (ALS) |
