| Product Type:                                   | Total RNA            |
| Disease State:                                  | Normal               |
| Diagnosis Category:                             | Normal               |
| Tissue:                                         | Kidney               |
| Frozen Sample ID:                               | FR5B33AA97           |
| Case ID:                                        | CI0000006958         |
| Prep:                                           | 2                    |
| Vial ID:                                        | RN00001040           |
| Tissue of Origin:                               | Kidney               |
| Site of Finding:                                | Kidney               |
| Appearance:                                     | Normal               |
| Sample Diagnosis (from Pathology Verification): | Within normal limits |
| Normal:                                         | 100%                 |
| Lesional:                                       | 0%                   |
| Tumor:                                          | 0%                   |
| Tumor Hypo/Acellular Stroma:                    | 0%                   |
| Tumor Hypercellular Stroma:                     | 0%                   |
| Necrosis:                                       | 0%                   |
| Pathology Verification notes from H&E review:   | 100% cortex          |
| Bioanalyzer Ratio (28S/18S):                    | 1.32                 |
