

# Product datasheet for CS508174

### Frozen Tissue Sections, Colon

### **Product data:**

| Product Type:   | Frozen Sections                     |
|---|-------------------------------------|
| Disease State:  | Cancer                              |
| Diagnosis Category:                                     | Colorectal Cancer                   |
| Tissue:   | Colon                               |
| Frozen Sample ID:                                       | FR0001BA6E                          |
| Case ID:  | CI000005835                         |
| Tissue of Origin:                                       | Colon                               |
| Site of Finding:  | Liver                               |
| Appearance:   | Т                                   |
| Sample Diagnosis (from<br>Pathology Verification):      | Adenocarcinoma of colon, metastatic |
| Normal:   | 30%                                 |
| Lesional:   | 0%                                  |
| Tumor:  | 50%                                 |
| Tumor Hypo/Acellular<br>Stroma:                         | 15%                                 |
| Tumor Hypercellular<br>Stroma:                          | 0%                                  |
| Necrosis:   | 5%                                  |
| CASE Diagnosis (from<br>medical center path<br>report): | Adenocarcinoma of colon, metastatic |
| Age:  | 57                                  |
| Gender:   | Female                              |
| Race:   | Not reported                        |
| Tumor Grade:  | AJCC G2: Moderately differentiated  |
