

## Product datasheet for **CS509946**

### Frozen Tissue Sections, Retroperitoneal region

#### Product data:

|   |                        |
|---|------------------------|
| Product Type:                                     | Frozen Sections        |
| Disease State:                                    | Other Disease          |
| Diagnosis Category:                               | Benign Tumors          |
| Tissue:   | Retroperitoneal region |
| Frozen Sample ID:                                 | FR0001F785             |
| Case ID:  | CI0000006220           |
| Tissue of Origin:                                 | Retroperitoneal region |
| Site of Finding:                                  | Retroperitoneal region |
| Appearance:                                       | T                      |
| Sample Diagnosis (from Pathology Verification):   | Ganglioneuroma         |
| Normal:   | 0%                     |
| Lesional:   | 0%                     |
| Tumor:  | 5%                     |
| Tumor Hypo/Acellular Stroma:                      | 0%                     |
| Tumor Hypercellular Stroma:                       | 95%                    |
| Necrosis:   | 0%                     |
| CASE Diagnosis (from medical center path report): | Ganglioneuroma         |
| Age:  | 59                     |
| Gender:   | Female                 |
| Race:   | Not reported           |
| Tumor Grade:                                      | Not Reported           |

|                              |  |
|------------------------------|--|
| Minimum Stage Grouping:      | Not Reported   |
| T (Extent of Primary Tumor): | Not Reported   |
| N (Lymph node metastasis):   | Not Reported   |
| M (Distant metastasis):      | Not Reported   |
| Storage:                     | Store frozen tissue sections at -80°C.   |
| Stability:                   | All frozen tissue sections are stable for 1 year from date of purchase if stored at -80°C without repeated freeze/thaws. |
