

# Product datasheet for CS517415

### Frozen Tissue Sections, Colon

#### **Product data:**

| Product Type:   | Frozen Sections                     |
|---|-------------------------------------|
| Disease State:  | Other Disease                       |
| Diagnosis Category:                                     | Inflammatory Bowel Disease (IBD)    |
| Tissue:   | Colon                               |
| Frozen Sample ID:                                       | FR5B33C5D6                          |
| Case ID:  | CI000007772                         |
| Tissue of Origin:                                       | Colon                               |
| Site of Finding:  | Colon                               |
| Appearance:   | L                                   |
| Sample Diagnosis (from<br>Pathology Verification):      | Colitis, ulcerative, chronic active |
| Normal:   | 90%                                 |
| Lesional:   | 10%                                 |
| Tumor:  | 0%                                  |
| Tumor Hypo/Acellular<br>Stroma:                         | 0%                                  |
| Tumor Hypercellular<br>Stroma:                          | 0%                                  |
| Necrosis:   | 0%                                  |
| Pathology Verification<br>notes from H&E review:        | normal: 20% submucosa, 80% muscle   |
| CASE Diagnosis (from<br>medical center path<br>report): | Colitis, ulcerative, chronic active |
| Age:  | 42                                  |
| Gender:   | Male                                |
| Race:   | White or Caucasian                  |
