| Product Type:   | Frozen Sections                      |
|---|--------------------------------------|
| Disease State:  | Normal                               |
| Diagnosis Category:                                     | Normal                               |
| Tissue:   | Colon                                |
| Frozen Sample ID:                                       | FR0002BCDF                           |
| Case ID:  | CI000009272                          |
| Tissue of Origin:                                       | Colon                                |
| Site of Finding:  | Colon                                |
| Appearance:   | R                                    |
| Sample Diagnosis (from<br>Pathology Verification):      | Within normal limits                 |
| Normal:   | 100%                                 |
| Lesional:   | 0%                                   |
| Tumor:  | 0%                                   |
| Tumor Hypo/Acellular<br>Stroma:                         | 0%                                   |
| Tumor Hypercellular<br>Stroma:                          | 0%                                   |
| Necrosis:   | 0%                                   |
| Pathology Verification<br>notes from H&E review:        | 50% mucosa, 50% submucosa, 0% muscle |
| CASE Diagnosis (from<br>medical center path<br>report): | Colitis, ulcerative, chronic         |
| Age:  | 31                                   |
| Gender:   | Female                               |
| Race:   | White or Caucasian                   |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

|          | Frozen Tissue Sections, Colon – CS524001 |  |
|----------|--|--|
| Storage: | Store frozen tissue sections at -80°C.   |  |

Stability:All frozen tissue sections are stable for 1 year from date of purchase if stored at -80°C<br/>without repeated freeze/thaws.
