

## Product datasheet for **CS525022**

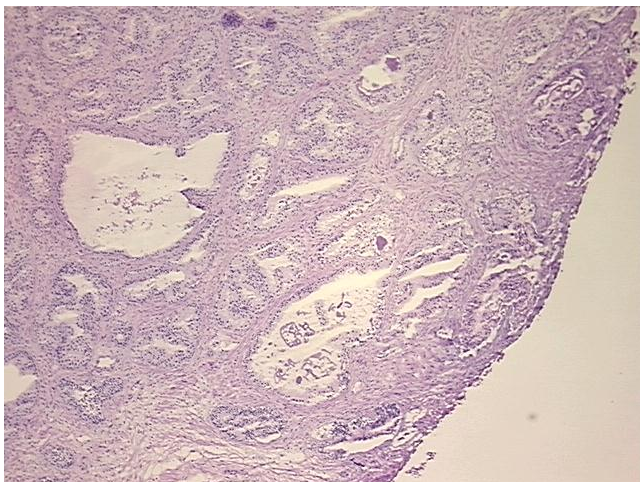

### Frozen Tissue Sections, Prostate

#### Product data:

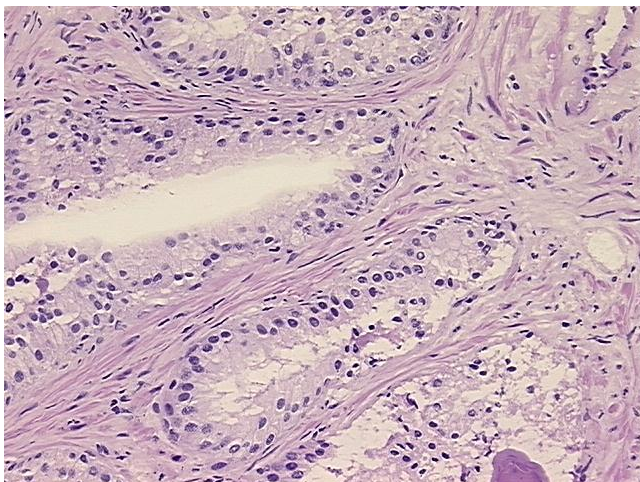

|                                                   |                                                     |
|---------------------------------------------------|-----------------------------------------------------|
| Product Type:                                     | Frozen Sections                                     |
| Disease State:                                    | Other Disease                                       |
| Diagnosis Category:                               | Benign Prostatic Hyperplasia (BPH)                  |
| Tissue:                                           | Prostate                                            |
| Frozen Sample ID:                                 | FR0002B5A6                                          |
| Case ID:                                          | CI0000009661                                        |
| Tissue of Origin:                                 | Prostate                                            |
| Site of Finding:                                  | Prostate                                            |
| Appearance:                                       | L                                                   |
| Sample Diagnosis (from Pathology Verification):   | Glandular and fibromuscular hyperplasia of prostate |
| Normal:                                           | 0%                                                  |
| Lesional:                                         | 100%                                                |
| Tumor:                                            | 0%                                                  |
| Tumor Hypo/Acellular Stroma:                      | 0%                                                  |
| Tumor Hypercellular Stroma:                       | 0%                                                  |
| Necrosis:                                         | 0%                                                  |
| CASE Diagnosis (from medical center path report): | Glandular and fibromuscular hyperplasia of prostate |

|            |                                                                                                                          |
|------------|--------------------------------------------------------------------------------------------------------------------------|
| Age:       | 82                                                                                                                       |
| Gender:    | Male                                                                                                                     |
| Race:      | White or Caucasian                                                                                                       |
| Storage:   | Store frozen tissue sections at -80°C.                                                                                   |
| Stability: | All frozen tissue sections are stable for 1 year from date of purchase if stored at -80°C without repeated freeze/thaws. |
