

## Product datasheet for **CS532551**

### Frozen Tissue Sections, Breast

#### Product data:

|                                                 |                                                                               |
|-------------------------------------------------|-------------------------------------------------------------------------------|
| Product Type:                                   | Frozen Sections                                                               |
| Disease State:                                  | Normal                                                                        |
| Diagnosis Category:                             | Normal                                                                        |
| Tissue:                                         | Breast                                                                        |
| Frozen Sample ID:                               | FR00033E67                                                                    |
| Case ID:                                        | CI0000013078                                                                  |
| Tissue of Origin:                               | Breast                                                                        |
| Site of Finding:                                | Breast                                                                        |
| Appearance:                                     | R                                                                             |
| Sample Diagnosis (from Pathology Verification): | Within normal limits                                                          |
| Normal:                                         | 100%                                                                          |
| Lesional:                                       | 0%                                                                            |
| Tumor:                                          | 0%                                                                            |
| Tumor Hypo/Acellular Stroma:                    | 0%                                                                            |
| Tumor Hypercellular Stroma:                     | 0%                                                                            |
| Necrosis:                                       | 0%                                                                            |
| Pathology Verification notes from H&E review:   | Non Tumor Structures: 5% Glandular epithelium, 70% Stroma, 25% Adipose tissue |

|                                                          |                                                                                                                          |
|----------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------|
| <b>CASE Diagnosis (from medical center path report):</b> | No pathologic disease                                                                                                    |
| <b>Age:</b>                                              | 34                                                                                                                       |
| <b>Gender:</b>                                           | Female                                                                                                                   |
| <b>Race:</b>                                             | Black or African American                                                                                                |
| <b>Storage:</b>                                          | Store frozen tissue sections at -80°C.                                                                                   |
| <b>Stability:</b>                                        | All frozen tissue sections are stable for 1 year from date of purchase if stored at -80°C without repeated freeze/thaws. |
