

## Product datasheet for CS542156

## Frozen Tissue Sections, Colon: right

## **Product data:**

Product Type:

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

| rioduct type.                                           | TTOZETT SECTORS                    |
|---------------------------------------------------------|------------------------------------|
| Disease State:                                          | Cancer                             |
| Diagnosis Category:                                     | Colorectal Cancer                  |
| Tissue:                                                 | Colon                              |
| Frozen Sample ID:                                       | FR00036207                         |
| Case ID:                                                | CI0000017173                       |
| Tissue of Origin:                                       | Colon: right                       |
| Site of Finding:                                        | Colon: right                       |
| Appearance:                                             | Т                                  |
| Sample Diagnosis (from<br>Pathology Verification):      | Carcinoma of colon, neuroendocrine |
| Normal:                                                 | 0%                                 |
| Lesional:                                               | 0%                                 |
| Tumor:                                                  | 80%                                |
| Tumor Hypo/Acellular<br>Stroma:                         | 5%                                 |
| Tumor Hypercellular<br>Stroma:                          | 5%                                 |
| Necrosis:                                               | 10%                                |
| CASE Diagnosis (from<br>medical center path<br>report): | Carcinoma of colon, neuroendocrine |
| Age:                                                    | 40                                 |
| Gender:                                                 | Female                             |
| Race:                                                   | Black or African American          |
| Tumor Grade:                                            | Not Reported                       |

Frozen Sections
