

## Product datasheet for **CS608404**

### Frozen Tissue Sections, Breast

#### Product data:

|                                                   |                        |
|---------------------------------------------------|------------------------|
| Product Type:                                     | Frozen Sections        |
| Disease State:                                    | Other Disease          |
| Diagnosis Category:                               | Benign Tumors          |
| Tissue:                                           | Breast                 |
| Frozen Sample ID:                                 | FR00004468             |
| Case ID:                                          | CU0000001356           |
| Tissue of Origin:                                 | Breast                 |
| Site of Finding:                                  | Breast                 |
| Appearance:                                       | T                      |
| Sample Diagnosis (from Pathology Verification):   | Fibroadenoma of breast |
| Normal:                                           | 0%                     |
| Lesional:                                         | 0%                     |
| Tumor:                                            | 15%                    |
| Tumor Hypo/Acellular Stroma:                      | 30%                    |
| Tumor Hypercellular Stroma:                       | 55%                    |
| Necrosis:                                         | 0%                     |
| CASE Diagnosis (from medical center path report): | Fibroadenoma of breast |

|                              |                                                                                                                          |
|------------------------------|--------------------------------------------------------------------------------------------------------------------------|
| Age:                         | 36                                                                                                                       |
| Gender:                      | Female                                                                                                                   |
| Tumor Grade:                 | Not Reported                                                                                                             |
| Minimum Stage Grouping:      | Not Reported                                                                                                             |
| T (Extent of Primary Tumor): | Not Reported                                                                                                             |
| N (Lymph node metastasis):   | Not Reported                                                                                                             |
| M (Distant metastasis):      | Not Reported                                                                                                             |
| Storage:                     | Store frozen tissue sections at -80°C.                                                                                   |
| Stability:                   | All frozen tissue sections are stable for 1 year from date of purchase if stored at -80°C without repeated freeze/thaws. |
