

# Product datasheet for CS609373

### **Frozen Tissue Sections, Esophagus**

#### **Product data:**

| Product Type:   | Frozen Sections                   |
|---|-----------------------------------|
| Disease State:  | Cancer                            |
| Diagnosis Category:                                     | Esophageal/Gastroesphageal Cancer |
| Tissue:   | Esophagus                         |
| Frozen Sample ID:                                       | FR0000533B                        |
| Case ID:  | CU0000001481                      |
| Tissue of Origin:                                       | Esophagus                         |
| Site of Finding:  | Esophagus                         |
| Appearance:   | Т                                 |
| Sample Diagnosis (from<br>Pathology Verification):      | Adenocarcinoma of esophagus       |
| Normal:   | 0%                                |
| Lesional:   | 0%                                |
| Tumor:  | 30%                               |
| Tumor Hypo/Acellular<br>Stroma:                         | 0%                                |
| Tumor Hypercellular<br>Stroma:                          | 70%                               |
| Necrosis:   | 0%                                |
| CASE Diagnosis (from<br>medical center path<br>report): | Adenocarcinoma of esophagus       |
| Age:  | 71                                |
| Gender:   | Male                              |
| Tumor Grade:  | AJCC G3: Poorly differentiated    |
| Minimum Stage<br>Grouping:                              | III                               |
