

## Product datasheet for **CS613576**

### Frozen Tissue Sections, Small intestine

#### Product data:

|                                                 |                                      |
|-------------------------------------------------|--------------------------------------|
| Product Type:                                   | Frozen Sections                      |
| Disease State:                                  | Normal                               |
| Diagnosis Category:                             | Normal                               |
| Tissue:                                         | Small intestine                      |
| Frozen Sample ID:                               | FR00007BEA                           |
| Case ID:                                        | CU00000001926                        |
| Tissue of Origin:                               | Small intestine                      |
| Site of Finding:                                | Small intestine                      |
| Appearance:                                     | R                                    |
| Sample Diagnosis (from Pathology Verification): | Within normal limits                 |
| Normal:                                         | 100%                                 |
| Lesional:                                       | 0%                                   |
| Tumor:                                          | 0%                                   |
| Tumor Hypo/Acellular Stroma:                    | 0%                                   |
| Tumor Hypercellular Stroma:                     | 0%                                   |
| Necrosis:                                       | 0%                                   |
| Pathology Verification notes from H&E review:   | 85% mucosa, 15% submucosa, 0% muscle |

**CASE Diagnosis (from medical center path report):** Adenocarcinoma of pancreas, ductal

**Age:** 76

**Gender:** Male

**Tumor Grade:** AJCC G2: Moderately differentiated

**Minimum Stage Grouping:** IIB

**T (Extent of Primary Tumor):** T3

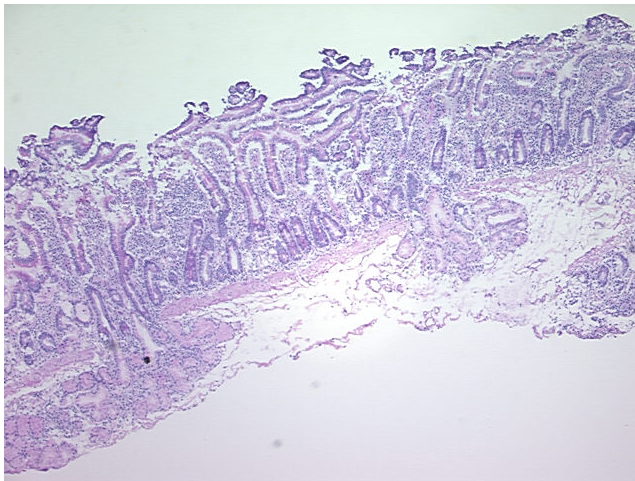

**N (Lymph node metastasis):** N1

**M (Distant metastasis):** MX

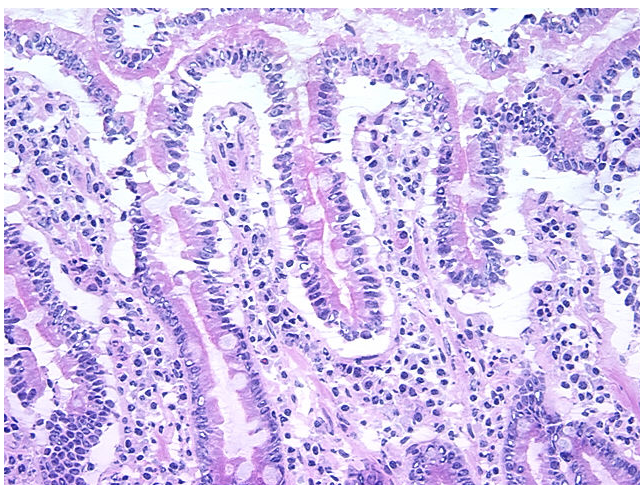

**Storage:** Store frozen tissue sections at -80°C.

**Stability:** All frozen tissue sections are stable for 1 year from date of purchase if stored at -80°C without repeated freeze/thaws.
