

## Product datasheet for CS619221

### Frozen Tissue Sections, Colon

#### Product data:

|                                                   |                                     |
|---------------------------------------------------|-------------------------------------|
| Product Type:                                     | Frozen Sections                     |
| Disease State:                                    | Cancer                              |
| Diagnosis Category:                               | Colorectal Cancer                   |
| Tissue:                                           | Colon                               |
| Frozen Sample ID:                                 | FR00026CE9                          |
| Case ID:                                          | CU00000005396                       |
| Tissue of Origin:                                 | Colon                               |
| Site of Finding:                                  | Liver                               |
| Appearance:                                       | T                                   |
| Sample Diagnosis (from Pathology Verification):   | Adenocarcinoma of colon, metastatic |
| Normal:                                           | 15%                                 |
| Lesional:                                         | 0%                                  |
| Tumor:                                            | 65%                                 |
| Tumor Hypo/Acellular Stroma:                      | 0%                                  |
| Tumor Hypercellular Stroma:                       | 5%                                  |
| Necrosis:                                         | 15%                                 |
| CASE Diagnosis (from medical center path report): | Adenocarcinoma of colon, metastatic |
| Age:                                              | 57                                  |
| Gender:                                           | Female                              |
| Tumor Grade:                                      | Not Reported                        |
| Minimum Stage Grouping:                           | IV                                  |

T (Extent of Primary Tumor): TX

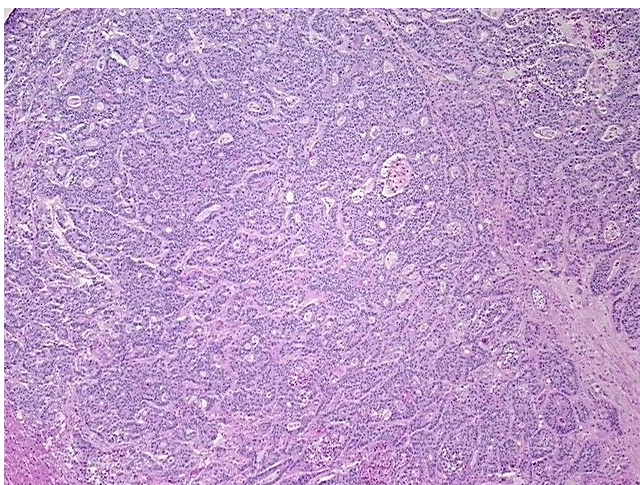

N (Lymph node metastasis): NX

M (Distant metastasis): M1

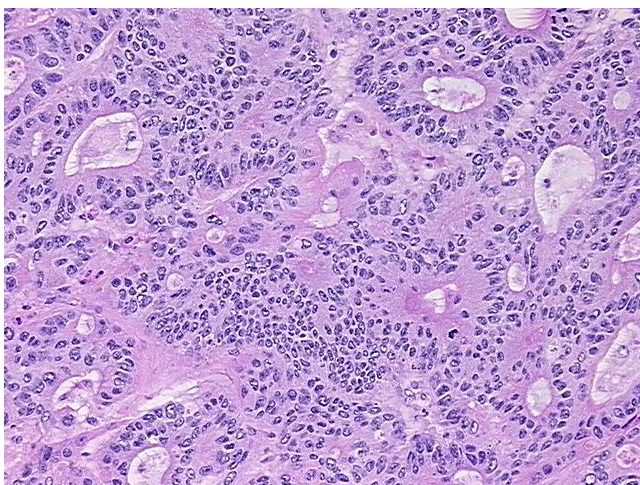

Storage: Store frozen tissue sections at -80°C.

Stability: All frozen tissue sections are stable for 1 year from date of purchase if stored at -80°C without repeated freeze/thaws.
