

## Product datasheet for **CS632131**

### Frozen Tissue Sections, Colon: right

#### Product data:

|                                                 |                       |
|-------------------------------------------------|-----------------------|
| Product Type:                                   | Frozen Sections       |
| Disease State:                                  | Other Disease         |
| Diagnosis Category:                             | Benign Tumors         |
| Tissue:                                         | Colon                 |
| Frozen Sample ID:                               | FR5B33B58F            |
| Case ID:                                        | CU0000006811          |
| Tissue of Origin:                               | Colon: right          |
| Site of Finding:                                | Colon: right          |
| Appearance:                                     | T                     |
| Sample Diagnosis (from Pathology Verification): | Adenoma of colon      |
| Normal:                                         | 0%                    |
| Lesional:                                       | 0%                    |
| Tumor:                                          | 90%                   |
| Tumor Hypo/Acellular Stroma:                    | 10%                   |
| Tumor Hypercellular Stroma:                     | 0%                    |
| Necrosis:                                       | 0%                    |
| Pathology Verification notes from H&E review:   | tubulovillous adenoma |
