

## Product datasheet for **CS638307**

### Frozen Tissue Sections, Ovary: right

#### Product data:

|                                                   |                                              |
|---------------------------------------------------|----------------------------------------------|
| Product Type:                                     | Frozen Sections                              |
| Disease State:                                    | Other Disease                                |
| Diagnosis Category:                               | Borderline Ovarian Tumor                     |
| Tissue:                                           | Ovary                                        |
| Frozen Sample ID:                                 | FR00032ECE                                   |
| Case ID:                                          | CU0000011196                                 |
| Tissue of Origin:                                 | Ovary: right                                 |
| Site of Finding:                                  | Ovary: right                                 |
| Appearance:                                       | T                                            |
| Sample Diagnosis (from Pathology Verification):   | Tumor of ovary, papillary serous, borderline |
| Normal:                                           | 0%                                           |
| Lesional:                                         | 0%                                           |
| Tumor:                                            | 70%                                          |
| Tumor Hypo/Acellular Stroma:                      | 0%                                           |
| Tumor Hypercellular Stroma:                       | 30%                                          |
| Necrosis:                                         | 0%                                           |
| Pathology Verification notes from H&E review:     | cellular tumor stroma: 100% desmoplasia      |
| CASE Diagnosis (from medical center path report): | Tumor of ovary, papillary serous, borderline |
| Age:                                              | 53                                           |
| Gender:                                           | Female                                       |
| Tumor Grade:                                      | AJCC GB: Borderline malignancy               |

Minimum Stage Grouping: IIIC

T (Extent of Primary Tumor): T3c

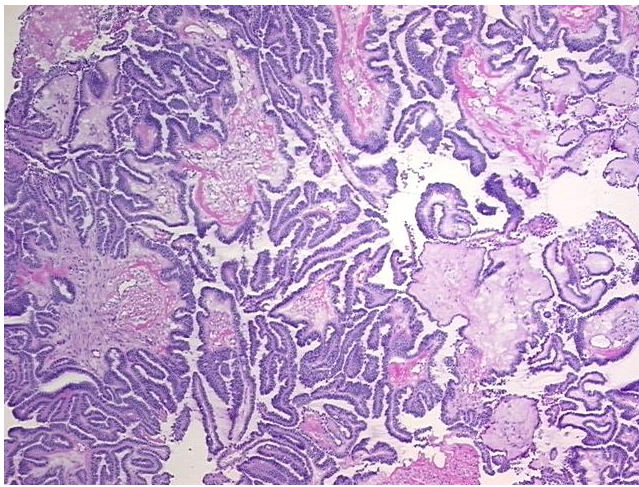

N (Lymph node metastasis): N1

M (Distant metastasis): MX

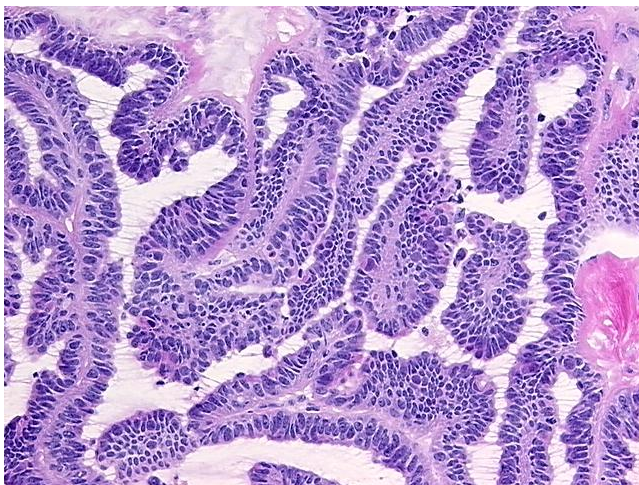

Storage: Store frozen tissue sections at -80°C.

Stability: All frozen tissue sections are stable for 1 year from date of purchase if stored at -80°C without repeated freeze/thaws.
