

## Product datasheet for **CS651148**

### Frozen Tissue Sections, Colon

#### Product data:

|                                                   |                              |
|---------------------------------------------------|------------------------------|
| Product Type:                                     | Frozen Sections              |
| Disease State:                                    | Cancer                       |
| Diagnosis Category:                               | Colorectal Cancer            |
| Tissue:                                           | Colon                        |
| Frozen Sample ID:                                 | FR00044C3D                   |
| Case ID:                                          | CU0000018758                 |
| Tissue of Origin:                                 | Colon                        |
| Site of Finding:                                  | Colon                        |
| Appearance:                                       | T                            |
| Sample Diagnosis (from Pathology Verification):   | Adenocarcinoma of colon      |
| Normal:                                           | 15%                          |
| Lesional:                                         | 0%                           |
| Tumor:                                            | 55%                          |
| Tumor Hypo/Acellular Stroma:                      | 30%                          |
| Tumor Hypercellular Stroma:                       | 0%                           |
| Necrosis:                                         | 0%                           |
| CASE Diagnosis (from medical center path report): | Adenocarcinoma of colon      |
| Age:                                              | 84                           |
| Gender:                                           | Male                         |
| Tumor Grade:                                      | AJCC G1: Well differentiated |
| Minimum Stage Grouping:                           | IIB                          |

T (Extent of Primary Tumor): T4

N (Lymph node metastasis): N0

M (Distant metastasis): MX

Storage: Store frozen tissue sections at -80°C.

Stability: All frozen tissue sections are stable for 1 year from date of purchase if stored at -80°C without repeated freeze/thaws.
